

A diagram illustrating a genetic cross. At the bottom is a thick gray horizontal bar. Above it, on the left, is a vertical gray bar labeled A . In the center is another vertical gray bar labeled T . On the right, a vertical gray bar is shown above a stacked bar chart. The stacked bar chart has three segments: the bottom segment is labeled $2n$, the middle segment is labeled $2n - 1$, and the top segment is labeled $n - 1$ size groups. The vertical gray bar on the right is positioned at the top of the stacked bar chart.
